

MARSHMALLOW MADNESS

Lick 'Em and Stick 'Em

Okay, you may not want to actually lick them, but wet marshmallows have a tendency to stick, depending on the texture of the surface against which you throw them. You'll definitely want to practice this first, but take some marshmallows, wet them, and then throw them at the ceiling. If they stick well, you might want to have a competition to see whose marshmallow can stick the longest. Of course, be aware that some of them might stick for days or even weeks. Imagine students showing up for church and checking to see if the marshmallows are still there.

Spiritual Application: What are you stuck on? How strongly is your life joined with Christ? What are you doing to feed this connection?
