

## Math Phenomenon with Age\*

*You'll need a calculator for this...*

1. Pick the number of times a week that you would like to have chocolate, being more than once but less than 10.
2. Multiply this number by 2.
3. Add 5.
4. Multiply it by 50.
5. If you have already had your birthday this year add 1755 ....If you haven't, add 1754.
6. Now subtract the four digit year that you were born.
7. Now add the number of years that have passed since 2005. (For example, if the year is 2009, you would add 4.)
8. You should have a three digit number

The first digit of this was your original number of how many times you want to eat chocolate each week

The next two numbers are you AGE!
